

Data Science & Machine Learning Internship

README

Repository: upskillCampus

Overview

This repository contains the work completed during the Data Science and Machine Learning Internship. It includes datasets, notebooks, source code, models, and the final internship report. The project demonstrates data preprocessing, exploratory data analysis, feature engineering, machine learning model development, evaluation, and visualization.

Objectives

- Learn the data science workflow.
- Build and evaluate machine learning models.
- Visualize insights from data.
- Document findings in a final report.

Technologies

Python, NumPy, Pandas, Matplotlib, Scikit-learn, Jupyter Notebook.

Repository Structure

README.md

How to Run

1. Clone the repository.
2. Install dependencies: `pip install -r requirements.txt`
3. Open Jupyter Notebook or run Python scripts.
4. Execute notebooks in order.

Learning Outcomes

Data cleaning, EDA, model training, evaluation, visualization, and project documentation.
